About me

About Me

- ▶ Happy husband and father
- ▶ Senior Developer at Erlang Solutions
- ▶ MongooseIM technical lead
- ▶ XSF member
- ▶ Amateur runner

2.

What I'm going to talk about

AGENDA

- ▶ MongooseIM
 - ▷ 2.0.0 and 2.0.1
 - ▷ 2.1.0
- ▶ Tide - continuous load testing
- ▶ MongooseIM Push
- ▶ MongooseIM ICE

3.1

MongooseIM
2.0.0 and 2.0.1

“

MongooseIM platform 2.0.0:
higher value and lower friction

MongooseIM platform

- ▶ More than an just XMPP server
- ▶ Contribution to XMPP libraries:
 - ▷ Smack - for Android
 - ▷ XMPPFramework - for iOS
- ▶ Sample application to start from:
 - ▷ MangostaIOS
 - ▷ MangostaAndroid
- ▶ Other components:
 - ▷ WombatOAM
 - ▷ Tide
 - ▷ MongooseIM Push
 - ▷ MongooseIM ICE

MongooseIM - REST API for backend services

- ▶ For backend developers integrating other components with MongooseIM
- ▶ So far only `mongooseimclt` was the only option
 - ▷ Need to connect to the node and execute the command
- ▶ Starting from version [2.0.0](#) integration is possible with a simple [REST API](#)
 - ▷ Swagger spec for [2.0.0](#), [2.0.1](#) and [2.1.0beta1](#) and [latest](#) on mongooseim.readthedocs.io

MongooseIM - REST API for client's connection

- ▶ For client developers loving REST and JSON
- ▶ Some XMPP functionalities available over REST now
- ▶ Application prototyping made easier and faster
 - ▷ Basic functionalities for now:
 - ▷ sending/reading messages
 - ▷ group chats
 - ▷ SSE (Server Sent Events) from 2.0.1
 - ▷ Swagger spec for [2.0.0](#), [2.0.1](#) and [2.1.0beta1](#) and [latest](#) on mongooseim.readthedocs.io

MongooseIM - **MUC Light**

- ▶ Current MUC from XEP-0045 is very complex
- ▶ Mobile-only or mobile-first application needs only small subset of XEP-0045
- ▶ MUC light - presence less and much simpler group chat
 - ▷ Full specification at: mongooseim.readthedocs.io
 - ▷ More was said [last year by Ludwik](#)

MongooseIM - Pub Sub

- ▶ Not every MongooseIM installation is just about chat
- ▶ Non-chat real time solutions can be based on XEP-0060: PubSub
- ▶ This is a foundation for many systems based on a publish-subscribe pattern
 - ▷ Also some other XMPP extensions are based on PubSub
 - ▷ XEP-0163: Personal Eventing Protocol
 - ▷ XEP-0277: Microblogging over XMPP
 - ▷ XEP-0357: Push Notifications

“

MongooseIM 2.0.1: more **stability** for **app developers**

MongooseIM 2.0.1

- ▶ HTTP File Upload
- ▶ SSE for REST clients
- ▶ Many improvements:
 - ▷ New cassandra backend for MAM
 - ▷ Simplified MAM configuration
 - ▷ MUC optimisation
 - ▷ Erlang-process hibernation
 - ▷ Deep hibernation
 - ▷ ODBC backend for MUC light

3.2

MongooseIM 2.1.0

“

What happens when you give
your **team freedom**

MongooseIM 2.1.0beta1

- ▶ XEP-0357: Push Notifications
 - ▷ Plus standalone component in Elixir
- ▶ Integration with Amazon SNS
 - ▷ Pushing system events
- ▶ Full text search for MAM
 - ▷ Riak KV
 - ▷ MySQL/Postgres
- ▶ XMPP pipelining
- ▶ Erlang distribution over TLS

4.

Continuous Load Testing

MongooseIM - keeping an eye on quality

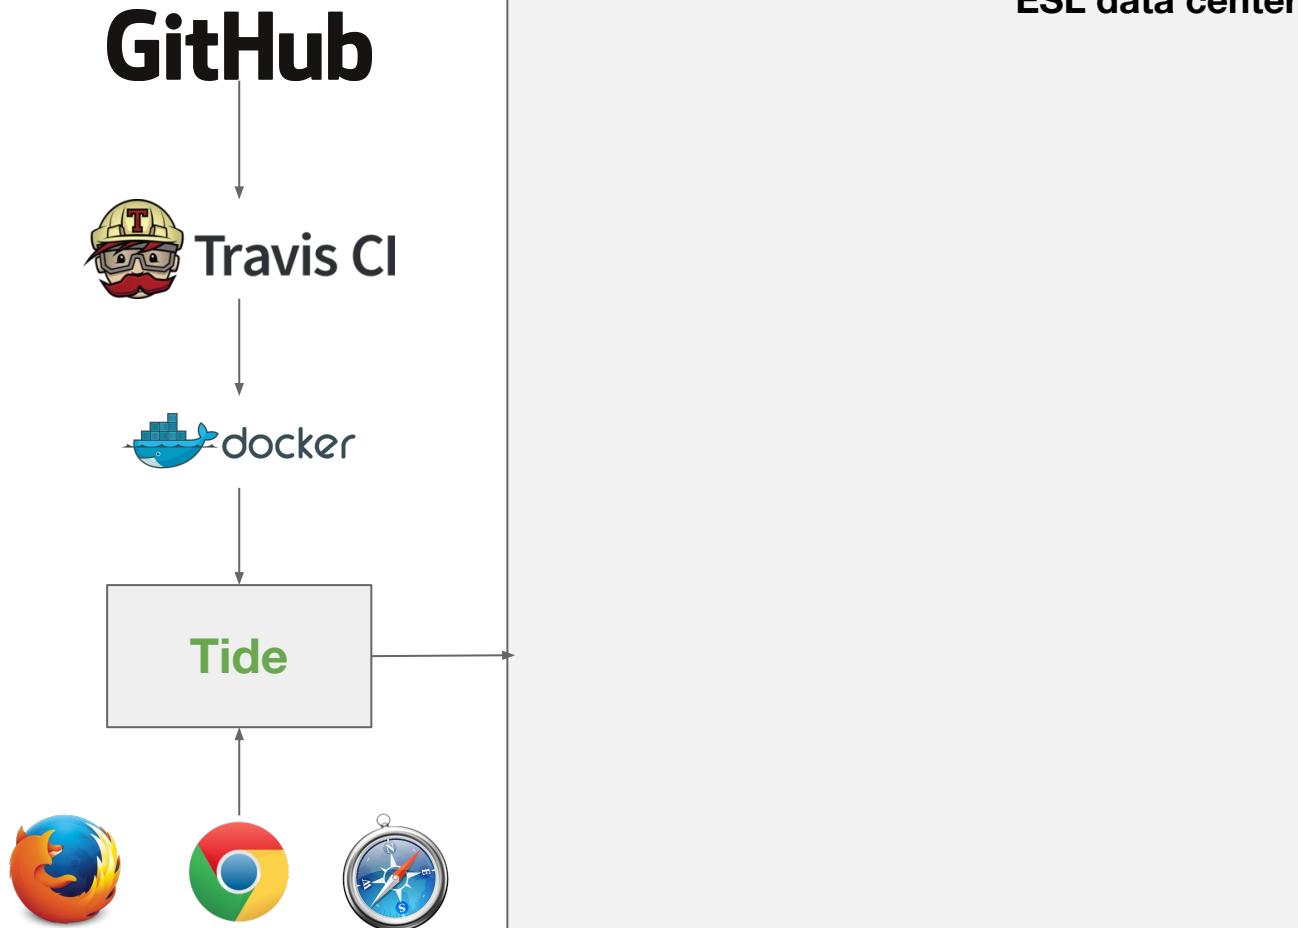

- ▶ Big set of functional test suites
 - ▷ Run on travis-ci.org
 - ▷ 8 different jobs
 - ▷ Different Erlang/OTP version
 - ▷ Different MongooseIM configurations
 - ▷ 34-38 minutes
 - ▷ Dedicated job for dialyzer only
- ▶ Code coverage now over 70%
 - ▷ coveralls.io
- ▶ Coding style checking
 - ▷ [Elvis CI](https://github.com/erlang-solutions/elvis) by Inaka

MongooseIM - **continuous load testing**

- ▶ Keeping an eye on performance
- ▶ tide.erlang-solutions.com
- ▶ Integrated with GitHub pull requests
- ▶ Automated load testing
 - ▷ Docker swarm
 - ▷ Setting and cleaning the infrastructure
 - ▷ Running load tests
 - ▷ Collecting metrics

docker

How?

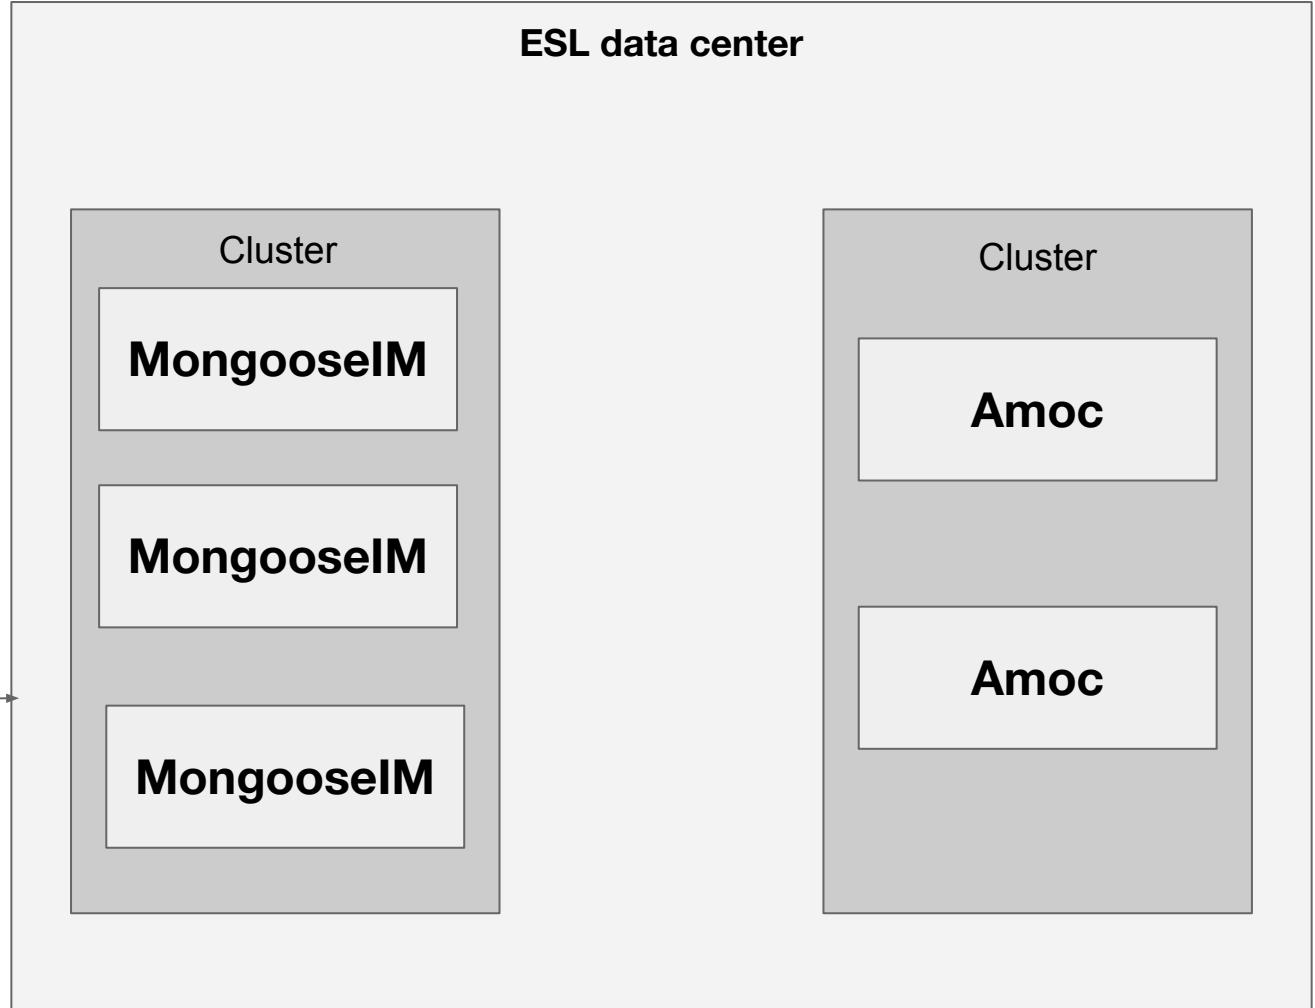

GitHub

Travis CI

docker

MongooseIM - **continuous load testing**

- ▶ Predefined:
 - ▷ configuration files
 - ▷ load test scenarios
- ▶ Configurable:
 - ▷ Number of users
 - ▷ Number of nodes in the cluster
 - ▷ Arrival rate
- ▶ Possibility to upload custom
 - ▷ config files
 - ▷ scenarios

Reconnect time

Reconnect time (pipelined)

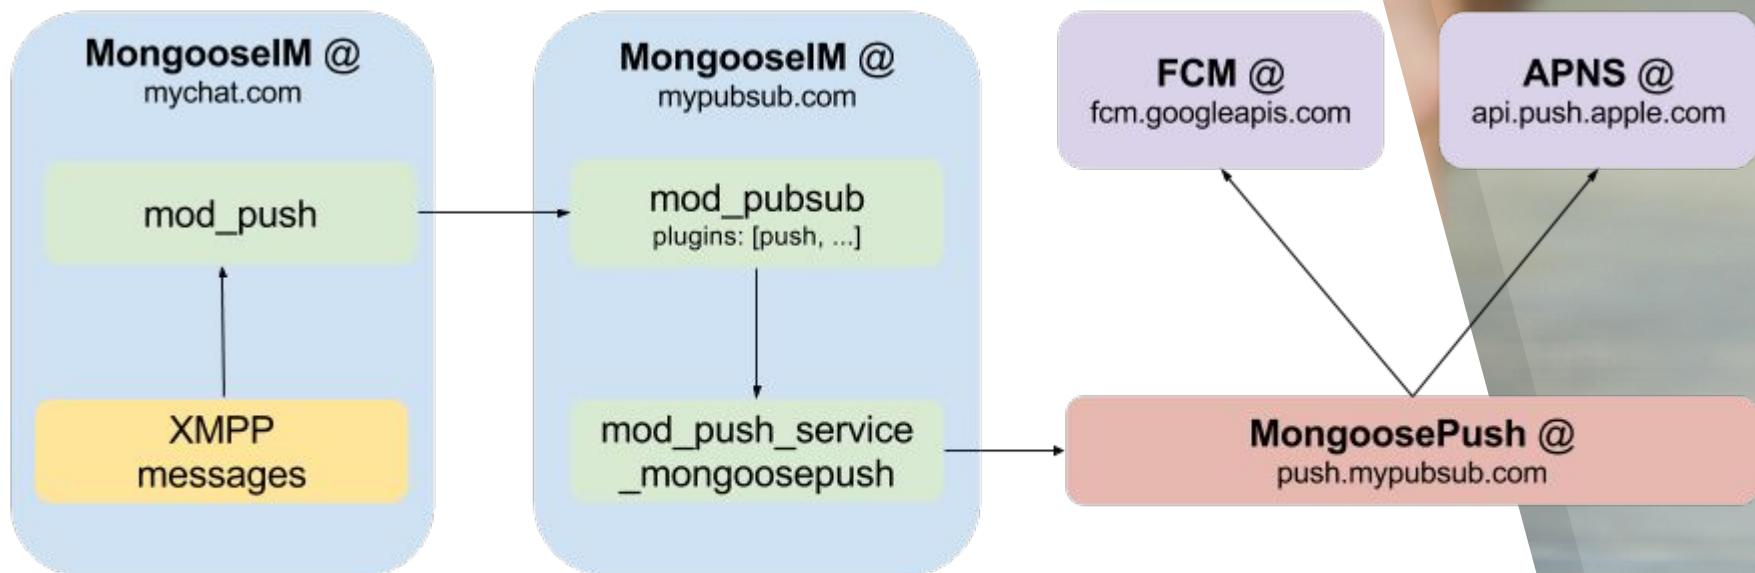

5.

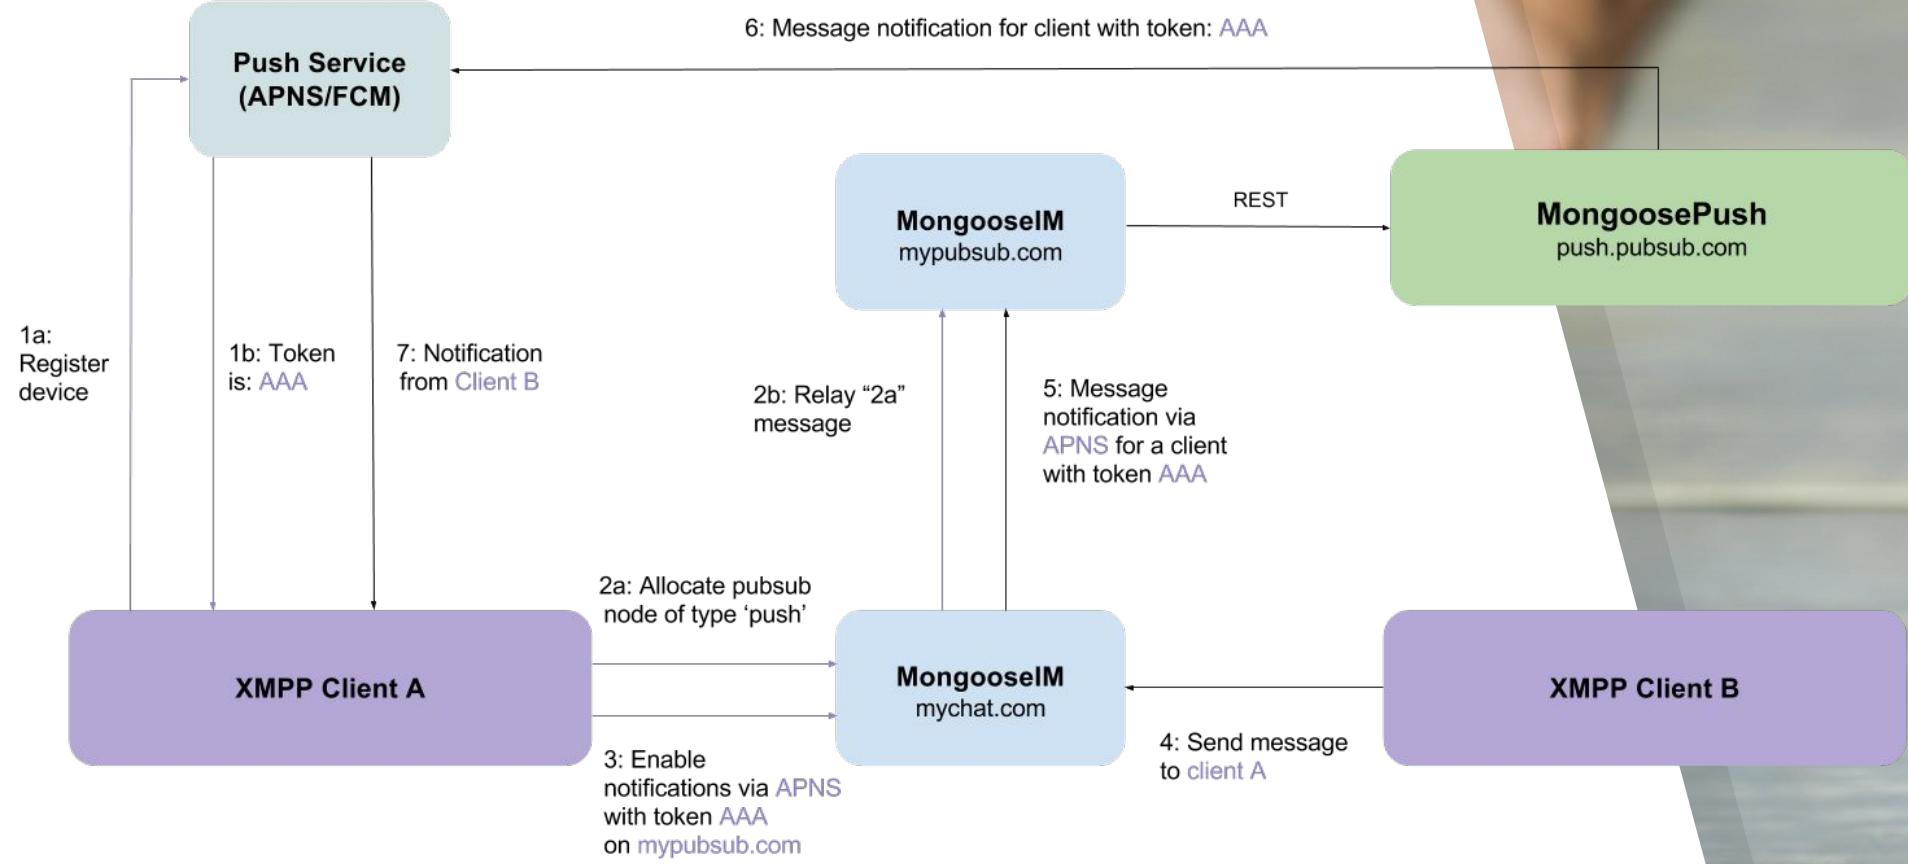

MongooseIM Push

MongooseIM Push

- ▶ Standalone component
- ▶ Written in Elixir
- ▶ Exposing simple REST API
- ▶ Talking with FCM and APNS
- ▶ Used to enable push notification with MongooseIM
- ▶ Simple tutorial at mongooseim.readthedocs.io
- ▶ <https://github.com/esl/MongoosePush>

5.

MongooseM ICE

MongooseIM ICE

- ▶ Code name **fennec**
- ▶ Standalone component
- ▶ Written in Elixir
- ▶ STUN/TURN server
- ▶ Used to set up peer-to-peer connection
- ▶ Can be used as a relay server if p2p is not possible
- ▶ Simple tutorial at mongooseim.readthedocs.io

Thank you
